SNAIL CONCENTRATE CH-SP

Regeneration +

REGENERATE YOUR SKIN

CHEMIR S.A. presents the ideal product to regenerate and soften skin that has been exposed to alterations such as wounds, burns, UV radiation, stretch marks, etc.

SNAIL CONCENTRATE CH-SP is obtained from the slime of the snail *Helix aspersa*.

It is rich in natural components such as SOD and GST proteins, which are in charge of eliminating oxygen free radicals.

The endogenous production of these compounds decreases over the years, so an additional external contribution is necessary.

FUNCTIONS

- Regeneration of the skin.
- Peeling and calming effect.
- Emollient for skin and hair.
- Blurring effect on skin blemishes.
- Control of vascular problems.

EFFICACY

In Vitro

The study was carried out through three double-blind tests with 20 people with dry skin and ages between 40 and 65 years. To determine the variation in the skin of the trial participants, the applied area was measured using a corneometer.

A two-month treatment with SNAIL CONCENTRATE CH-SP increases skin hydration by 25.5%

MOISTURIZING POWER

DECREASED WATER TRANSFER LOSS (TEWL)

The measurement of transcutaneous evaporation has been carried out using a device called Tewameter®. It is a device that measures the density gradient of the TEWL using two pairs of temperature / relative humidity sensors.

This part of the study was carried out again by means of a double-blind trial, in which half of the volunteers were applied SNAIL CONCENTRATE CH, while in the other half a placebo cream was used in order to compare the results.

Dermal water loss is reduced by 30.5% after a two-month treatment with SNAIL CONCENTRATE CH-SP

SNAIL CONCENTRATE CH-SP scores the highest possible in terms of smoothness, firmness and topography
