PROPERTIES

- Antiinflammatory action
- Antioxidant and photoaging protection
- Refreshing properties
- Keratolytic action
- Antimicrobial action

BIOACTIVE INGREDIENTS

WILLOW EXTRACT

Rich in polyphenols, flavonoids and salicylic derivatives. It has antiinflammatory and refreshing properties.

SAGE EXTRACT

Rich in saponins, flavonoids and tannins. Antioxidant properties and tonicant action that could be used in alopecia cases.

CALENDULA EXTRACT

Contains flavonoids, triterpene alcohols, carotenoids, polysaccharides, and saponosides. It has a moisturizing, antimicrobial and protective action against photoaging.

TOMATO EXTRACT

Rich in carbohydrates, in elements like potassium and magnesium, in vitamins C, B1, B2, B3, and in carotenoids like lycopene. It has moisturizing and antioxidant properties, stimulates the activity of corneocytes which photoaging provides.

SALICYLIC ACID

Beta hydroxy acid that has keratolytic properties. It is suitable for fighting dandruff, which is often associated with an excess sebum.
